

SOLAR PV:

Technology and Valuation

for REALTORS® and Appraisers

Thursday, July 11 | 9:00am - 12noon | SAR Mack Powell Event Center
2003 Howe Avenue, Sacramento

Approved for 3 hours of CE Credit | DRE 5031-1004

Instructor:
Debra Little

Home Performance & Valuation Specialist with field experience in both appraising and home performance

Real estate agents and appraisers will develop the expertise to better serve their clients in the buying, selling and financing of solar-powered homes. They will be equipped with knowledge of solar PV technology and valuation methods. They will develop skills to represent solar-powered homes accurately in sales, to better guide both sellers and buyers and to complete valuations competently.

- What are the 3 key questions to ask regarding homes with solar?
- Gain an understanding of solar PV technology, including system components and what to look for during inspections and how CA utility rate structures impact homeowner purchasing decisions.
- Includes links to 2 free online tools to help with documentation and calculating present value.
- CA will require all new homes to include solar starting in 2020. REALTORS® with expertise in solar will deliver value our clients will increasingly expect. *For details:* <https://tinyurl.com/ya5blr36>.
